DETAILED ACTION
EXAMINER'S AMENDMENT

(1). An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Leonard Miller on 7/2/2009.

The application has been amended as follows:

Cancel claims 9 and 10.

Allowable Subject Matter

(2). **Claims 1, 3-8 and 11** are allowed.

Reasons for Allowance

(3). The following is an examiner's statement of reasons for allowance:

This instant application is in condition of allowance because the pH of the aqueous alkaline washing liquid in the mercaptan-removal zone is higher than the pH of the aqueous washing liquid in the H₂S removal zone, to obtain a mercaptan-depleted gas stream and an thiolate-comprising aqueous stream as cited in instant claim 1, which overcomes prior arts of the records as per said prior art does not anticipate nor render obvious to this operating condition for method of selectively remove hydrogen sulfide and mercaptan in a gaseous hydrocarbon stream.

Closest prior art of record – Buisman (US 5354545A) teaches the process for the removal of sulphur compounds from gases (Title). The pH in the system is preferably kept at about 8-9. Buisman (US 5354545) does not teach 2nd step of removing mercaptan. Although prior art Fernandez de la Vega et al (US 5659109A) teach, conventionally, the mercaptans have been removed by pretreating the natural gas feed stream with either a physical or chemical solvent, or a molecular sieve. Where high levels of mercaptans are encountered, removal techniques specific to mercaptans must be used in addition to the treatment process for carbon dioxide and hydrogen

sulfide (Col. 1, line 19-24), the combined teaching of Buisman, Fernandez de la Vega et al (US 5659109) do not teach the pH values difference in two removal zones, one for hydrogen sulfide, the other for mercaptans as claimed by Applicants.

Such different range of pH values for removal of hydrogen sulfide and mercaptans as claimed in instant claim 1 is to be considered novel and passed to issue as of date of this Allowability Notice.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
